

2W Rotary Attenuator

- DC~6GHz, 10dB, 1dB Step, SMA Female to SMA Female

Features:

The rotary step attenuator can adjust the power level of the microwave circuit in a stepped manner within a certain of frequency range without interrupting the circuit.

It can also be used as an internal attenuator for instruments and equipment, featuring small size, high precision, stability and reliability.

Product ID	MAT-2SAF-6G-10D-1
------------	-------------------

Electrical & Mechanical Specifications

Frequency Range (MHz)	DC~6GHz
Attenuation Range(dB)	0-10
Accuracy (dB)	±0.5
Attenuation Step(dB)	1
VSWR	≤1.50:1
Power Capacity (W)	2
Impedance (Ohm)	50
Connector Interface	SMA Female to SMA Female

Environmental Specifications

Working Temperature	-55°C~+125°C
---------------------	--------------
